

Trauma Clinic

What is the Trauma Clinic?

The Trauma Clinic is an outpatient clinic for patients who have experienced traumatic injuries that require follow-up. The clinic is staffed by the same mid-level providers (Physician Assistants/Nurse Practitioners) that cared for you during your initial hospitalization. You will be evaluated and any studies (x-rays/CT scans/lab work) felt to be necessary will be performed. ***Appointments are required*** to be seen in the clinic. Generally, you will be contacted prior to your visit to pre-register for your appointment.

Where is the Trauma Clinic located?

The Trauma Clinic is located in the Emergency Department at Utah Valley Regional Medical Center. You will check in at the Emergency Department registration desk. Notify the staff on arrival that you have an appointment to be seen in the Trauma Clinic. Otherwise you will be registered as an ER patient with its attendant wait times.

When is the Trauma Clinic?

Trauma Clinic is held one day each week; generally on Wednesdays. Appointments will typically start in the early afternoon. Every effort will be made to keep the predetermined schedule and to minimize your wait time. Please return the courtesy and arrive a few minutes early for your appointment.

How do I make an appointment?

Ideally your appointment will be made before your discharge from the hospital. However, if you need to make an appointment, or need to change your appointment, contact the clinic scheduler (Wendy) at **(801) 357-7735**. Leave a voice message with your name, number, and what you need. Calls to this number will only be returned during normal business hours. If you have emergent needs, go to the nearest Emergency Department or call 911.
